Product Specifications

TRIOCTYL TRIMELLITATE

-----TOTM-----

Appearance: transparent oily liquid with slight smell under normal temperature

H.S. CODE: 2917399090

CAS NO.: 3319-31-1

Molecular formula: C₃₃H₅₄O₆

Molecular weight: 546.23

Specifications: Q/THG 008

Standard Item	Grade One
Color Shade, (Pt- Co) max	30
Density (20deg.c) g /cm ³	0.984~0.991
Acidity , m g KOH/g max	0.15
Ester Content % min	99
Flashing Point, deg.c min	240
Moisture, % max	0.1
Volume resistivity ohm. c m min	5×10 ¹¹

Main application: It is suitable for various plastics such as polyvinyl chloride, vinyl chloride copolymer, nitrocellulose, ethyl butyrate cellulose, polymethyl methacrylate and so on. Plasticizing efficiency and processing performance are close to phthalate plasticizers, excellent in durability and electrical properties, and can be used for heat-resistant and durable products such as heat-resistant wire and cable materials, sheets and sheet gaskets.

Storage: over 1 year normally

Package: 200kgs/steel drum

1000kgs/IBC TANK

22000kgs/flexitank
